## Change Log 11/12/2016

---

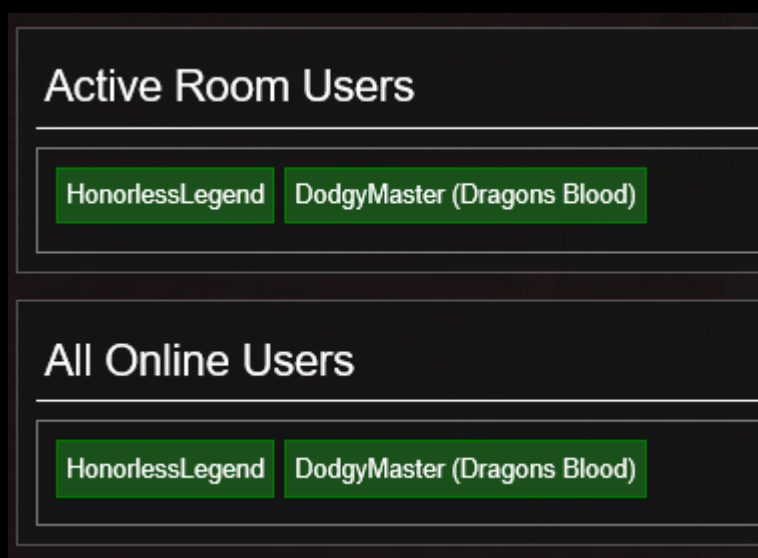

### Online users in each chat room

The mini chat box now has the above box to the right side of the main chat box. Every time you change rooms this will update to tell you who is in the room with you.

The large chat box which you can get to by clicking the "Chat" link above the chat box has 2 sections for users.

### Updating your LoH player level

You can now update your player level from your profile page. This will instantly increase or decrease your level based on the sign you click.

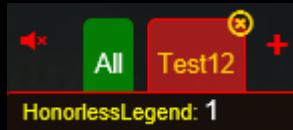

LoH Player Level: **[+] 20 [-]**

## New message indicator for multiple chat rooms

It is often the case that you are part of more than a single chat room. This becomes difficult to remember to check all the rooms for new messages.

With this update, you will now be able to determine which rooms have new messages. While the website is open and your internet connection is active, you will get the following behaviour.

Above is a user that is currently in “Test12”. A new message has been posted to All which has now highlighted the tab green. When you go to the tab it will go back to the normal colour.

## Performance Updates

With the new update, there should be a noticeable increase in the site loading times and navigation times. Some of the times cannot be improved much due to the restrictions of the hosting provider.
